Download Surveillance and observation software now more powerful than ever before The world's first true panoramic camera is the Z-Axis, and it's a powerful tool that can be utilized for the creation of high-quality, impressive video footage and still images. Using the camera, users can record 4k video and view the same scene from every angle, which is certainly impressive to say the least. But its true value is the fact that it can be easily operated and put into action without having to worry about all the technical details. The Z-Axis is a fully integrated, lightweight device that has four lenses, a position sensor and several technical features. It also has a powerful, 27.5mm sensor to capture stunning high quality footage from any position. Apart from panning, the camera can also tilt from -20 to +20 degrees to capture different angles of the target. The Z-Axis also has a high resolution of 1,920x1,080 pixels and is compatible with IOS and Android operating systems. Users can record up to 4k at 60fps, and can choose to record in RAW or use the video capabilities of the Z-Axis to run a still camera to capture their subjects in motion. It even has an integrated a flashlight and universal tripod to avoid putting any unnecessary stresses on the tripod attachment. It can be charged via USB, or with AA batteries to provide much needed autonomy. The Z-Axis also has many other features including night vision, a high definition microphone for reliable audio recording, and a wide dynamic range sensor that can capture images in dark conditions without any issues. It comes with the SmartCam 2, a variety of high quality and fine-tuned accessories that include a powerful LED light, a HD camera, a 360° open-frame lens, a microphone mount, a 360° panning lens, a LCD monitor, a USB interface,
